Exhibitor Name	Exhibit Name	Category	Premiere	New Function/ Feature	Contact	Booth No.
	VTX	M		VTX combines a large 1,800cc liquid-cooled V-twin engine with a traditional custom design with full of chrome parts. As a result, it ensures throbbing and exhilarating feel.		
	CB1300 Super Four	M		CB1300 is the flagship of the naked sport motorcycle range with its big body size yet exhilarating handling performance. Powered by a liquid-cooled 4-stroke 1,300cc engine, it ensures big torque and quick throttle response.		
	VTR	M		Featuring truss-type frame, powered by a light and compact liquid-cooled 250cc 4-stroke V-twin engine, VTR performs superbly, especially in the normal operation range. Newly equipped is dual chrome plated meter and lower 760mm seat.		
	Hornet	M		Powered by cam-gear train liquid-cooled in-line 4-stroke 250cc engine and features steel mono-back-bone frame, Hornet combines the unique styling with one-class higher class tyres. 15mm lower seat is newly equipped.		
	Solo	M		A cheery, stylish, around-town leisure commuter with an air-cooled 4-stroke 50cc engine. It is the fourth model in the N Project series. Features a retro-styling with a slender tank, saddle seat and 18 inch wheels.		
	smart Dio	M		Powered by a liquid-cooled 4-stroke engine and features aluminium die cast frame, 'smart Dio' combines sleek design such as multi-reflector headlight and flush surface bodywork with sporty ride.		
	Spacy100	M		Powered by air-cooled 4-stroke engine, Spacy100 ensures smooth acceleration, low emission and better fuel efficiency. 12 inch front aluminium wheel enables stable performance. Optimal body size is just fitted for comfortable tandem ride as well.		
	Dio	M		Even a reasonable price, Dio is equipped with one class-higher devices such as shutter-key, multi-reflect headlight and combi-brake. Powered by air-cooled 50cc 4-stroke engine, Dio ensures optimal ease, good economy and reliability.		
	Today	M		Even a reasonable price, Today is equipped with one class-higher class devices such as shutter-key, pre-wiring for immobilizer and combi-brake. Powered by air-cooled 50cc 4-stroke engine, Today ensures optimal ease, good economy and reliability.		
	crea Scoopy i	M		Powered by a liquid-cooled 50cc 4-stroke engine, crea Scoopy i incorporates economy and performance. Features LCD communication meter that announces fuel efficiency, time, date and even birthday if input the date.		
	XR250 Custom	M		XR250 is 250cc dual-purpose model equipped a 43mm inverted front fork. Capacitor Discharge Ignition (CDI) ensures optimal ignition timing. Wide variety of customize parts are available.		
	XR250 Motard Custom	M		Based on XR250, 17 inch aluminium rims, wheels and on-road tyres are equipped for Motard use. Seat are lowered by 20mm than base model. Wide variety of customized parts are available.		
	Fusion TypeX Audio Surround System Custom	M		Based on renowned Fusion, short wind screen, pipe handlebar and back rest are equipped to 'type-X'. Navigation-audio (prototype) made by Honda Access Corp. is installed for better riding comfort.		
	Shadow<400> Custom	M		Shadow<400> is renowned as a retro-styling with original frame and dual rear suspensions. Features large capacity air-cleaner and 2in1 slash cut exhaust system, it ensures powerful and throbbing performance. Wide variety of customized parts are available.		
	Silverwing<600>ABS Custom	M		With its comfort equipment and sporty ride, ground-braking Silver Wing <600> ABS ensures comfortable long term touring. Wide variety of customized parts are available.		
	RC211V	R		Features a unique framework and powered by 4-stroke V-5 powerplant, RC211V dominated its mighty performance by winning 11 races of 2003.		

Motorcycles: List/North Hall

Exhibitor Name	Exhibit Name	Category	Premiere	New Function/ Feature	Contact	Booth No.
	CBR954RR	R		Based on CBR954RR US type, mirrors and indicators are removed, and tyres, ECU, suspension springs are modified for racing use. CBR954RR demonstrated its performance in JSB1000 and Suzuka 8-Hours.		
	CBR600RR	R		Ridden by Team Moto Win Racing in the grueling Suzuka 4-Hour Endurance Road Race, this racer more than adequately demonstrated its superb overall balance of performance over 101 laps.		
	CRF250R	M		Powered by powerful and torquey liquid-cooled 4-stroke OHC 250cc engine, CRF250R produces incredible speed and acceleration in Motocross Race with optimal controllability.		
	CRF70F	M		The CRF70F is also an entry off-road special powered by a air-cooled 4-stroke engine with a bottom neutral transmission which can be ridden in a limited area, most appropriate for novice motocross riders.		
	CRF50F	M		The CRF50F is an entry off-road special powered by a air-cooled 4-stroke engine with a bottom neutral transmission which can be ridden in a limited area, most appropriate for novice motocross riders.		
	CRF450R	R		Featuring a narrow aluminium twin-spar frame and 4-stroke single cylinder motocross engine, CRF450R demonstrates its superb overall balance of performance in World Motocross Championship.		
	RTL	R		The nimble, responsive handling offered by the RTL's lightweight, compact chassis combined with the instant power-on-demand performance of its liquid-cooled 2-stroke power plant helped take to sixth consecutive Trial World Championship.		
	VTR1000SPW	R		VTR1000SPW is powered by liquid-cooled 4-stroke DOHC V-twin engine turned to achieve the highest performance potential leads to seventh consecutive Honda victory in the Suzuka 8-Hour Endurance Race.		
	RN01	R		RN01 is mountain bike racer for downhill race aimed for better maneuverability and controllability.

Yamaha Motor Co., Ltd.	YZF-R1	M		Adopting design ideas from Yamaha's MotoGP machines and the latest technologies available throughout the design, the new R1 has been built to be a "beautiful, exciting sports machine that wins the title of fastest through the turns on secondary roads.	Tokyo Public Relations Div. +81-3-5442-0808/ Public Relations Div. +81-538-32-1145	N09
	FZ6-S Fazer	M		These models mount a 600cc fuel injection power unit that has been developed directly from the YZF-R6 engine to ensure outstanding performance. The new frame is made with Yamaha's exclusive CF aluminum die casting technology .		
	FZ6-N FZ6	M		These models mount a 600cc fuel injection power unit that has been developed directly from the YZF-R6 engine to ensure outstanding performance. The new frame is made with Yamaha's exclusive CF aluminum die casting technology .		
	XT660R	M		This model is designed to answer the next-generation big trail model needs by offering running performance that makes around-town riding even more enjoyable,		
	XT660X	M		Based on the XT660R, this model recreates the excitement of the popular world of Super Motard. With features like a front brake combining a 320mm disc with 4-pot caliper, special outer tubes for the front fork and special tires .		
	XP500 TMAX	M		The TMAX, which has been so popular in Europe and other markets for its "fun motorcycle-like ride" despite its automatic transmission, now reappears with even more impressive performance.		
	XG250 Tricker	M		Mounting an air-cooled 250cc SOHC single cylinder engine on a YZ85 size chassis with 19-inch front and 16-inch rear wheels, this model proposes a new world of motorcycling fun.		

Motorcycles: List/North Hall

Exhibitor Name	Exhibit Name	Category	Premiere	New Function/ Feature	Contact	Booth No.
	YP250 Grand Majesty	M		Mounting a new-design DOHC 4-valve fuel injection engine on a new frame, the new Grand Majesty appears with higher overall performance specs. This is a new Majesty that achieves an even higher level of high-speed stability, comfort and convenience.		
	VINO/VINO DX	M		The popular fashion scooter VINO reappears with even cuter styling. The new environment-friendly liquid-cooled 4-stroke, 3-valve engine features the first plated cylinder ever on a Yamaha 50cc bike.		
	MABRICE	R		This a hybrid model that weds young "Low & Long" styling with outstanding performance in tandem riding. The main power unit is a 250cc engine that drives the rear wheel, while an in-hub electric motor in the front wheel adds extra power.		
	YP250Grand Majesty CUT MODEL	R				
	Tricker Pro	R		Based on the Tricker, this prototype boasts an aluminum fuel tank and carbon parts in places like the seat cover and front fender for a significant reduction in weight that further boosts the performance potential in aggressive riding.		
	Chivicker	R		This model brings the Tricker concept to the 50cc category. The result is a wedding of the BMX freestyle riding trend with 50cc sports. Featured here are unique design ideas like an aluminum in-frame fuel tank.		
	dolsa wind	R		This model proposes an entirely new type of electric vehicle (EV) with a unique ride that summons up the combined images of riding on the wind and the elegance of playing a musical instrument.		
	DIVIDE	R		This model has been developed around the concept of a "metal art commuter." The highly unique body proposes a new value sense. Built as a foldable electric vehicle with special design touches to make it easy to push when folded up,		
	Pocke	R		This model proposes a "multi-function minimum commuter." Features like fold-up handlebars, a pentagonal shaped aluminum frame and convenient functions like a storage space, have all been compressed into this minimum sized model .		
	Passol L	R		Taking the basic Passol functions and increasing the battery capacity has created this long-distance model. With its built-in charger, this model can be charged anywhere there is a 100V outlet. The result is a Passol with extended range of use.		
	FC06	R		This model mounts a direct methanol type fuel cell unit with an output of 500W on a 50cc size bike to create a fuel cell commuter driven by a motor. With a compact chassis that combines environment friendliness with sufficient running distance, .

Mahle Tennex Corp.	AIS Module	M		(1)Module-structure of Air cleaner and Plenum chamber (2)High sound-proof performance by adopting high capacity Air cleaner (3)Development economization by total development	Sales Support Dept. +81-3-3989-8412	N206
	Intake Manifold	M		The resin intake manifold is exhibited. •Intake manifold with variable valve.		
	Carbon Canister	M		Various Carbon Canisters including Canister Module satisfying the LEV-II/P-ZEV regulation are exhibited.		
	Head Cover	M		The resin head-cover built in Oil-mist-separator. Ultra light/miniaturized head-cover is materialized by miniaturizing the separator by adopting the inertia collision method for oil mist separation function.		
	EGR Cooler	M		The flexible tube is adopted to the heat-exchange tube, and the highly efficient, durable and compact EGR cooler becomes available.		
	Heat Exchanger	R		Oil-warmer made of the Aluminum for an automatic transmission. By make use of the special character of Aluminum the low cost is realized. It becomes easier to build it in to the body by the module structure.		
	Oil Cooler Module	M		Display of Echo-oil-filter module		
	Cabin Filter	M		Display of cabin filters of deodorization type and fine particle supplement type.		
	Vacuum Control Module	M		The vacuum control parts such as VC-Tank and hose, are made as module, and manufacturing cost becomes a half.		
	Oil Mist Separator	M		Exhibition of the various oil-mist-separators

	High-Voltage Sealed Connector for hybrid vehicles	M		The High Voltage Sealed Connector conforms to waterproof & electromagnetic shields used for high-voltage wiring in electric vehicles (including hybrid cars, fuel-cell powered cars, etc.).		
	Resin Mold Bus Ring for hybrid vehicles	M		A highly reliable and responsible priced Bus Ring that connects the 3-phase terminals of a slim DC brushless motor and the startor coils (18 pcs.) for power distribution.		
	Compact Relay Box	M		More compact and highly reliable relay box via a world first relay module structure that replaces the conventional plug-in relay with a semi-conductor relay		
	Automotive RF Connector	M		The Onboard Coaxial Connectors were designed for connecting a coaxial cable to an onboard multi-media device, such as a GPS navigation system or TV, and reduces reflection & transmission losses and controls noise generated from the connectors.		
	Shielded flat cable for Rear Seat Entertainment (RSE) systems			The cable with electric characteristics which matched to the demand of the adapting for car multimedia system made high-level was developed		
	Center Display Unit	M		The center of an instrument panel is equipped with a variety of switch panels, color monitors, etc. that form the core of on board advance information & LAN.The Center Module is a high-level information device that provides user-friendly car operations.		
	Front Side Monitoring Camera (also captures image directly below front face)	M		The Front Corner Monitoring Camera is installed in the center of the radiator grille. With this camera, the onboard screen of the car navigation system displays situations where viewing conditions are poor, such as entry into intersections.		
	Power Slide Door (PSD) Module	M		Power Slide Door (PSD) Module was designed to guarantee continuous power supply to the sliding door also when the door is opened.		
	Development of products for automotive multimedia (Optical and Metal)	R		We are developing high speed Optical Transceiver and Optical Repeater for automotive multimedia LAN.		
	0.64mm Connectors	M		0.64mm (025) connector is the smallest connectors for automotives among those specified in ISO8092, having male terminal tab width of 0.64mm		
	Halogen-free Automotive Wires	M		The Halogen-Free wires meet the requirements for the ISO standard. We are now attempting to reduce the diameter and weight (to approximately 20% that of the conventional type) of these wires.

The Furukawa Electric Co., Ltd.	Aluminum Alloy Wheel	M				N610
	MOST Optical Connector	M		Furukawa offers MOST optical connectors for in-vehicle optical network of the multi-media information.	Technical Planning & Development Dept. Automotive Productions Div. +81-749-38-4195	
	Dielectric Small-sized Plastic Chip Antenna	M		Furukawa developed the small chip antenna used for mobile apparatus, having used high dielectric thermoplasticity polymer from our company, and the rate of high electric conduction and quantity on-the-strength leadframe copper material as core technology.		
	Seat Module	M		Furukawa has developed a Seat Module. Seat Module integrates the electronic control unit (ECU), wire harness (W/H) and bracket. One of the features of the development is that it implements an infrared ray (IR) communication with the manual switch (SW).		
	High Speed Wiring Junction Block	M		As in-vehicle electric appliances improve in function, the number of circuits accommodated in a junction block, which can be defined as an effective device for simplifying wire harnesses, tends to increase.		
	Small Size Flexible-Wiring Junction Block	M		We have developed, therefore, a flexible-wiring junction block that allows flexible configuration of circuitwiring thus accommodating many joint connectors.		
	High performance relay box built in relay module	M		Furukawa materialized the relay box aiming at safety, environment measure, downsizing and reduction of weight.		
	METAL-CORE PCB JB (Junction block)	M		METAL CORE JB is more small size and light weight,with metal core PCB. • Metal core PCB Equalize temperature • TM sheet Siloxane-free, high insulation-resistance and heat-conductive • Power Plate High heat-transportation "		
	JB Analysis Tools	M		These tools improve the time consuming processes in computer simulation; model creation, mesh generation and boundary-condition input. It is not limited on heat transfer but more general cases.		
	Wire Harness for a roof module	M		Wire harness used several FFC with characteristic of thin and light weight.		
	High Voltage Connector for HEV and MHV	M		The needs of large current & high voltage systems like EV(Electric Vehicles) & HEV are getting higher .FURUKAWA offers high voltage (& large current) connectors with shielded and sealed structures.		
	State of Charge Sensor	R		Furukawa has developed the SOC (State of Charge) sensor for lead acid battery. Objective:Ecology, Optimization of idling stop, Mileage improvement and exhaust emissions reduction		
	36V Valve-Regurated Lead-Acid Battery	R		In order to dissipate the internal heat, thermal management measure with flat heat-pipe & fin is incorporated into hi-power 36V VRLA battery, which enables the life span triple or more compared to conventional 36V VRLA.		
DC-DC Converter	R		The DC-DC Converter is required for this Dual-Voltage system to convert high voltage to 14V for conventional loads. We have been developing the DC-DC Converter employing zero-current switching and other technologies.
